May 14, 2020

To whom it may concern:

On May 14, 2020 a Student Scholarship in the amount of \$1,000.00 was awarded to Adrienne Rosenthal of Clover Park Technical College. Clover Park Technical College is in Lakewood, Washington just south of Tacoma, Washington.

An essay was used by all applicants from one of the below listed topics.

1. What specific Nondestructive Testing Method interests you the most and why?
2. How does your field of study incorporate NDT - course work, labs, or OJT?
3. Describe the interface between NDT, Quality Engineering, and Process Engineering in a manufacturing environment.
4. Describe emerging NDT technologies you may decide to pursue as a career and why?

Adrienne chose to compose her essay on the impact of Ultrasonic Testing as finds this method the most interesting because of the range of materials it can be used on as well as industries it is used in.

Prior to sending recommendations of award to the Scholarship Chairman the Scholarship Committee reviewed each essay submitted using the following criteria.

- Was the essay submitted on time with a cover page listing all requested information?
- Were the format and content rules followed?
- Is the content appropriate for the topic selected?
- Content will be judged on a scale of 1 to 10.

Adrienne plans to use the scholarship for paying tuition and transportation costs to finish her NDT degree at Clover Park Technical College.

Sincerely,

Chris Maraschky
Chairman
Pacific Northwest section of ASNT
